India

Summary

I.T. Finance & Systems Advisor helping startups and SMEs build scalable finance operations, improve cash flow visibility, strengthen cost discipline, and enable data-backed founder decision-making. I help founders move from unstructured operations to clear financial controls, dashboards, budgets, runway models, and business metrics that support fundraising and sustainable growth.

I am a Senior Finance Advisor and Fractional CFO specializing in helping startups and growth-stage companies build scalable finance operations, investor-ready reporting structures, and data-driven decision systems.

Bringing 30+ years of experience across global finance transformation, ERP design, process re-engineering, cost optimization, cash flow visibility, and leadership alignment.

I work with founders to:

- Build financial systems that support scale (0 → 1 → 100 stage)
- Implement budgeting, burn-rate monitoring, and capital allocation discipline
- Design dashboards for investor reporting and performance visibility
- Formalize finance processes, controls, approval flows and audit readiness
- Enable predictive planning with Data & AI for financial forecasting

Currently advancing specialization in Deep Learning (IIIT-Bangalore) for financial forecasting and anomaly detection, strengthening my advisory approach for analytical and data-led decision support.

Available for: Fractional CFO Advisory, Finance Process Architecture, Digital Finance Implementation, and Founder/Leadership Strategy Support (Remote + Travel).

Experience

AI Orchestration, Data Scientist, GenAI, Machine Learning & Agentic Artificial Consultant

Information Communication Technology Management Consultant

November 2025 - Present (6 months)

Remote + Travel (India & International)

I partner with startups and growth-stage companies as a Fractional CFO and Finance Systems Advisor.

My role is to help your business move from founder-driven decisions to data-driven financial clarity.

I bring multi-years of experience in:

Finance transformation and operational structuring

Oracle ERP (Fusion & EBS) systems and scalable process design

Budgeting, forecasting and cash flow visibility models

Cost discipline, unit economics, margin and revenue path planning

Founder & leadership advisory for sustainable growth

And I am currently building advanced capability in:

Predictive analytics for cash flow, revenue and cost structures

Deep Learning models for anomaly detection and risk signals

Dashboards for real-time founder decision intelligence

My Advisory Model (Designed for Startups & SMBs)

Financial Clarity Setup : Burn → runway → cost → resource planning models

Finance System & Reporting Architecture: Dashboards, approvals, controls, month-end discipline

Founder Decision Support: Weekly strategy conversation + scenario planning

Team Capability Building - So the organization does not stay dependent on me

CROIX ROUGE BUSINESS SERVICES PVT. LTD.

Director Portfolio Management & Technical Strategist & Chartist

December 2020 - October 2025 (4 years 11 months)

Lucknow, Uttar Pradesh, India

Investor Acquisition and Engagement:

Identify, engage, and onboard big-ticket investors to expand the client base.
Build and nurture long-term relationships with investors, ensuring satisfaction and trust.

Technical Analysis and Market Insights:

Conduct comprehensive technical analysis for equities, bonds, and corporate fixed deposits.
